

ReleaseProof receipt

Release: Synthetic sample release

Checked: 17 July 2026, 00:00:00 UTC

OVERALL STATUS	PASS
----------------	------

Summary

SURFACE	STATUS	TARGETS	FAIL	UNKNOWN
Website	PASS	1	0	0
Feeds	PASS	1	0	0

Website targets

#	STATUS	AUDITED	PUBLIC URL
1	PASS	yes	https://example.com/

Feed targets

#	STATUS	FORMAT / AUDIT	PUBLIC URL
1	PASS	rss2 / yes	https://example.com/feed.xml

Configured findings

No fail or unknown records were present in the verified bundle. Complete pass evidence remains in the JSON and CSV artifacts.

---------	---

Interpretation boundary

Pass means the configured deterministic check found supporting evidence at the recorded time. Fail means it found contrary evidence. Unknown means the system could not establish a conclusion.

This receipt is not a vulnerability scan, penetration test, accessibility certification, legal opinion, ranking guarantee, uptime guarantee, or substitute for browser and user testing. Dynamic targets can change after the recorded timestamp.

The original JSON, CSV, screenshots, normalized input, and manifest are the authoritative evidence. This PDF is a human-readable rendering produced only after every original artifact matched its manifest hash.
